

Connect with hundreds of Airport Facility Professionals worldwide!

Formed in 2003, the Airport Facilities Council of IFMA seeks to address the challenges of managing airports in a global economy, with a focus on benchmarking, security practices, business development and emergency/disaster planning.

As part of the International Facility Management Association (IFMA), the Airport Facilities council's membership is open to IFMA members who have some degree of responsibility for an airport facility and those offering specialized products or services to meet their needs. All of IFMA's councils provide members with focused networking, targeted information, a community of interest, information sharing and a heightened marketability.

Airport facility personnel often work behind the scenes to improve passenger comfort by ensuring that everyday activities such as airfield operation and airport renovation and maintenance go smoothly and efficiently. In an effort to recognize their hard work and advance excellence in airport facilities, the council recognizes worthy facility management teams through their annual Airport Facility Award of Excellence program.

Sharing information is a necessity in today's global business community.

Truly global in nature, councils are not limited by geographic boundaries. You are able to communicate with colleagues worldwide about issues, concerns and best practices specific to airport facility management.

Join today. Just visit www.ifma.org for more information about IFMA. Click on the Chapters/Councils tab to link to the airport council website, and learn more about IFMA councils.

IFMA is the world's largest and most widely recognized international association for professional facility managers, supporting more than 19,000 members in 60 countries. The association's members, represented in 125 chapters and 15 councils worldwide, manage more than 37 billion square feet of property and annually purchase more than \$100 billion in products and services. Formed in 1980, IFMA certifies facility managers, conducts research, provides educational programs, recognizes facility management degree and certificate programs and produces World Workplace, the world's largest facility management conference and exposition.
